

Visualizing Collections of Internet Archives

John Berlin, Joel Rodriguez, Slobodan Milanko

Topic

- Create simple way to view collections of archives
 - Archiver - who started the collection
 - Tags - what words are important
 - Mementos - archive records
 - Time/date - timestamp for archive process
 - Domains - dominant resources of archiving
- User driven, clutter free, design for moderate collections

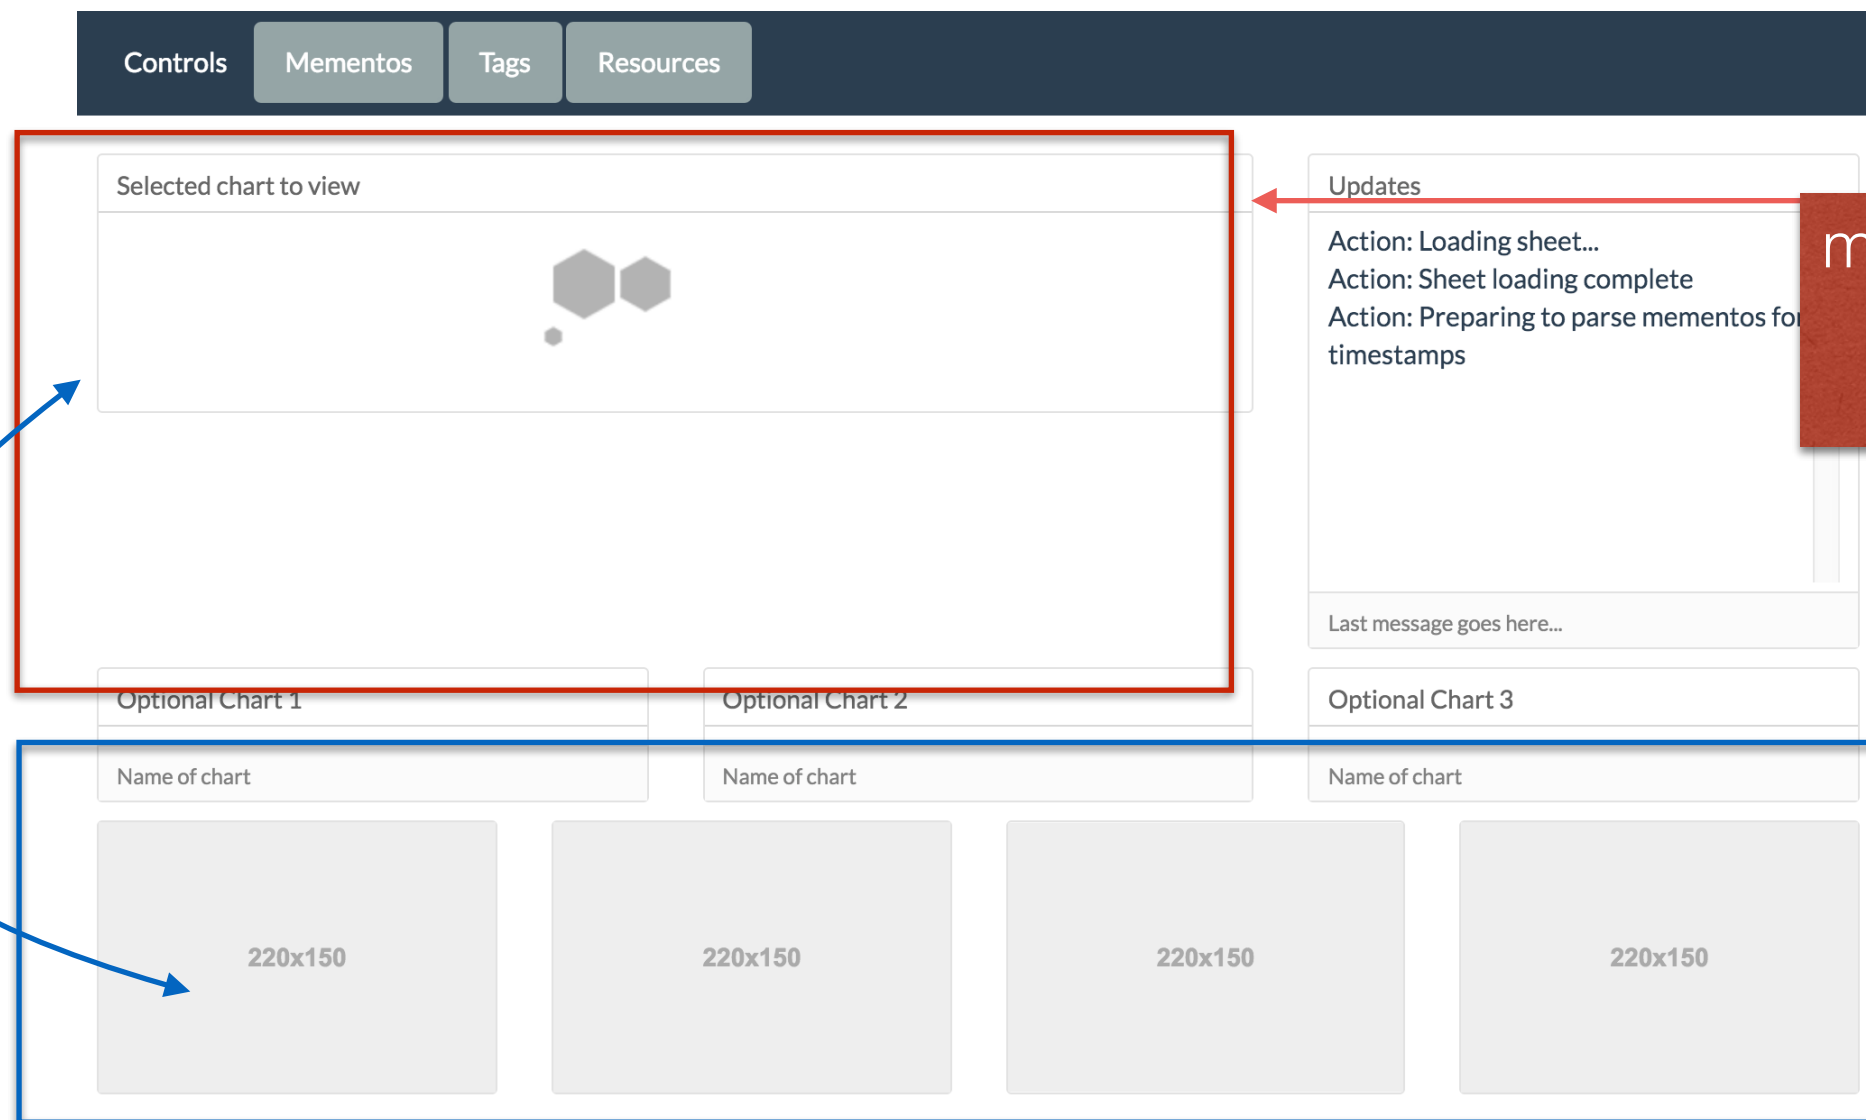

Design

focus area of archives
dictates change in views

responsive actions identifying
what the application is doing

Design

most appropriate
chart for area
of focus

Other charts to choose, and drag as the main view

Live Demo

<http://www.cs.odu.edu/~jrodrig/project/>

Tasks

- Connect to spreadsheet and retrieve data (Complete)
- Create different charts (In progress by all)
- Data manipulation operations:
 - Sorting: (Complete)
 - Grouping: (In queue)
 - Searching: (In queue)
 - Extracting: (Complete)
- Create dashboard (Complete)
- Modular / draggable views (In progress)

Estimation To Completion

- Modular / draggable views - 2 week
- Data manipulation operations - 2 week
- Create different charts - 3 weeks
- Testing / Overall review - 3-4 weeks
